ABSTRACT

Gomutra (Sanskrit: gomūtra; "cow urine") refers to the usage of cow urine for therapeutic purposes in traditional Indian medicine also used as an important component of the mixture called Panchagavya. Ayurveda has also emphasized the importance of Gomutra in the management of various disorders in all treatises. In SushrutaSamhita, the description of Gomutra (Cow urine) has been given as effective substance of animal origin with innumerable therapeutic importance. As per Ayurvedic literatures Gomutra is useful in number of diseases particularly in Gulma, Kushta, ascites, Arbud (cancer) and it is also used along with herbs to treat various diseases like fever, anemia, epilepsy, abdominal pain, various worm infestations, constipation.

Keywords: Gomutra, Gulma, Kushta, Panchagavya etc.

INTRODUCTION

In Hindu methodology 'Cow' has a prominent place and considered as ritual secrets also called as 'Gomata'. Gomutra is also an important component of the mixture called Panchagavya. Ayurveda has also emphasized the importance of Gomutra in the management of various disorders in all treatises. In Sushruta Samhita, the description of Gomutra (Cow urine) has been given as effective substance of animal origin with innumerable therapeutic importance. In our country, the consumption of cow urine (Gomutra) has been practicing since thousands of years to cure many illnesses. Cow urine (Gomutra) one of the ingredients in 'Panchagavya' is believed to have therapeutic value. [1] In India cow urine is used by majority of rural population as folklore remedy in almost all the states. As per Ayurvedic literatures Gomutra is

useful in number of diseases particularly in Gulma, Kushta, ascites, Arbud (cancer) and it is also used along with herbs to treat various diseases like fever, anemia, epilepsy, abdominal pain, various worm infestations, constipation. [2]

Properties of Gomutra: [3, 4]

Antimicrobial and Anthelmintic Activity [7]

The cow urine could be used for the treatment of the disease caused by Pathogenic bacteria, Opportunistic fungi and parasitic helminthes. It was reported from various analysis that cow urine concentrate shows more inhibition of gram positive bacteria in comparison of gram negative bacteria. Cow urine shows marked anthelmintic activity by causing paralysis and death of worms in a dose dependent manner. It was concluded that cow urine increases antibiotic activity against various pathogens due to its bio enhancing property.

Khadiradi kashaya along with Gomutra used in this study proves very good utility in the management of Purishajkrimi; it has very appreciable result in main symptoms of Purishaj krimi. [8]

Dose of Gomutra (cow urine) [9]

The general dose of the cow urine is 25ml at a time. When it is taken two times in a day the dose is 50ml. It is not harmful and provides protection against several diseases and improves immune power if taken on regular basis.

CONCLUSION

Practitioners of Ayurvedic medicine from India routinely use Gomutra as a remedy to treat many common disorders. In inaccessibility of Gomutra one can use the Gomutra Arka prepared with appropriate method and having similar properties like Gomutra. Gomutra Arka which is prepared by distillation of the Cow urine and more palatable due to its lower ammonia content and also need further research on its pharmacokinetics and pharmacodynamics aspect. Gomutra is very useful medicine with least side effects.
